

Application for Entry-Level Software/Web Developer Role

Dear Hiring Manager,

I am writing to express my interest in the Entry-Level Software/Web Developer position at your organization. I am currently pursuing my Master of Computer Applications (MCA) and have a strong foundation in MERN Stack development, including React.js, Node.js, Express.js, and MongoDB.

During my academic journey, I have developed full-stack projects such as an NGO Management System and a Hotel Management System. These projects helped me gain hands-on experience in building REST APIs, implementing JWT-based authentication, and creating responsive user interfaces. I have also worked on improving system efficiency and handling real-world data scenarios.

In addition, I have completed certifications from HackerRank, AWS (Forage), and Deloitte, which have strengthened my problem-solving and technical skills. I am a quick learner, passionate about coding, and enjoy working in collaborative environments.

I am eager to begin my professional career and contribute to your team by applying my skills and continuously learning new technologies. I would welcome the opportunity to discuss how my background aligns with your requirements.

Thank you for your time and consideration.

Sincerely,

Abhishek Yadav
